Why this course?

So you may be new to nails and just learned the basics... Or you may have been a nail tech for some time and have become comfortable offering nail extensions using the tip and overlay method. It's a great way to start offering nail extensions but do you know the benefits of sculpting nail extensions? Surely nail extensions are all the same, right?

So What is Sculpting?

Sculpting involves the use of a nail form, carefully positioned to act as a temporary platform upon which you then begin building a nail tip using your chosen nail system (either UV Gel or Acrylic). You then create a base for your nails and build upon this to create the desired nail length and effect e.g. pink and white, encapsulated glitter or art, coloured or clear nail extensions. There are a huge number of advantages to creating nail extensions using the sculpting method...
